

September 2017

Texas Responds to Hurricane Harvey

TETAF is grateful to all the first responders and medical personnel who have worked so diligently to save lives during Hurricane Harvey.

Coverage of the hurricane response can be found on the [news section](#) of our website. The National Weather Service has also posted a [comprehensive overview](#) of Hurricane Harvey and its impact on Texas.

Texas is lucky to have such amazing emergency response professionals and we want to highlight the work you're doing. Now is the time to reinforce to lawmakers the importance of disaster planning and response funding. Your firsthand stories and photos will go a long way in helping TETAF communicate these needs.

Please send updates to Courtney DeBower at cdebower@tetaf.org.
